Professional Summary

Data Analyst with hands-on experience building Power BI analytics solutions using SQL, Python, Excel, DAX, Power Query, and dimensional data modeling. Experienced in transforming raw and web-scraped data into analytical models, KPI frameworks, interactive dashboards, and business insights across real estate, healthcare, telecom, HR, sales, and sports. Built portfolio projects analyzing more than 84,000 records, units, customers, orders, matches, and employees, with a focus on translating business questions into measurable analysis and decision-support dashboards.

Education

Beni-Suef National University **2023 – Present**
B.Sc. in Computers and Artificial Intelligence — Medical Informatics *GPA: 3.5/4.00*

Experience

Route Academy Egypt **2026**
Data Analysis Trainee

- Applied Excel, SQL, Power BI, Python, Pandas, NumPy, Power Query, DAX, data cleaning, EDA, and data visualization across practical data-analysis workflows.
- Built analytical workflows covering data preparation, transformation, KPI development, dashboard design, exploratory analysis, and business reporting.
- Translated business requirements into structured data models, calculated measures, KPIs, and interactive Power BI visualizations.

Selected Projects

NOR Developments — Real Estate Sales & Installment Intelligence

Power BI | DAX | Power Query | Excel | Data Modeling

- Analyzed **73,943 units** across **8 real estate projects** using integrated sales and installment data.
- Built a **Galaxy Schema** with 2 fact tables and 6+ dimension tables covering projects, units, customers, payment plans, banks, and dates.
- Developed KPIs for units sold, sales conversion, invoiced and collected amounts, outstanding balance, bank exposure, cash exposure, and collection rate.

The Road to Glory — FIFA World Cup 2026 Data Experience

Power BI | Python | Beautiful Soup | Pandas | DAX | Power Query | HTML/CSS

- Modeled **48 teams, 104 matches, 16 stadiums, 308 goals, and 195 player scoring records** for interactive tournament analysis.
- Analyzed the complete tournament structure, including **72 group-stage matches** and **32 knockout matches**.
- Built analysis covering groups, knockout stages, referees, stadiums, scorers, own goals, and discipline, with **2.96 average goals per match**.

HR Attrition & Risk Intelligence

Power BI | DAX | Power Query | Data Modeling | Excel

- Analyzed **1,470 employee records** across 35 source attributes to identify workforce attrition patterns and risk drivers.
- Identified a **20.1 percentage-point attrition gap** between overtime and non-overtime employees: 30.5% vs. 10.4%.
- Compared travel-related attrition across 3 categories, with frequent travelers at 24.9%, rare travelers at 14.9%, and non-travelers at 8.0%.

Andalusia Healthcare Analytics

Power BI | DAX | Power Query | Data Modeling | Excel | Healthcare CRM

- Integrated healthcare data across **8 analytical tables** covering billing, marketing, medical CRM, payment, departments, countries, business units, and dates.
- Designed a dimensional Power BI model connecting operational, financial, marketing, and CRM information for cross-functional analysis.
- Developed KPI-driven dashboards covering **4+ healthcare business areas** for performance monitoring and management reporting.

Etisalat Customer Churn & Revenue Risk

Power BI / DAX / Power Query / Excel / Figma / HTML/CSS

- Analyzed **7,043 customers** and measured a **26.54% churn rate** across contract, payment, service, and customer dimensions.
- Quantified **\$2.86M in revenue at risk**, representing 17.83% of \$16.06M in total charges.
- Analyzed churn across 4+ business dimensions, including contract types, services, payment methods, and customer support factors.

SYSCO Sales & Operations Analytics

Power BI / DAX / Power Query / Data Modeling / Excel

- Analyzed **830 orders and 2,155 order lines** generating \$1.27M in sales across 91 customers, 77 products, 29 suppliers, and 9 employees.
- Measured **95.4% on-time shipment performance**, \$64.94K freight, \$1,525.53 average order value, and 37 late shipments.
- Identified revenue concentration across 8 product categories, with the **top 2 categories contributing 39.71% of total sales**.

Technical Skills

BI & Visualization: Power BI, DAX, Power Query, Excel, KPI Development, Dashboard Development

Data Analysis: SQL, Python, Pandas, NumPy, Matplotlib, Statistics, EDA, Data Cleaning, Data Transformation

Data Modeling: Dimensional Modeling, Galaxy Schema, ETL, Data Visualization

Web Data & Development: Web Scraping, Beautiful Soup, HTML, CSS

Tools: Git, GitHub

Professional: Analytical Thinking, Problem Solving, Communication, Teamwork, Presentation, Attention to Detail, Time Management, Business Understanding

Courses & Certifications

- **Advanced Data Analytics** — National Telecommunication Institute (NTI)
- **Linear Algebra for Machine Learning and Data Science** — DeepLearning.AI / Coursera
- **Python Level 1** — Microsoft
- **Python Level 2** — Microsoft
- **Git & GitHub Bootcamp** — Udemy

Honors & Achievements

- **Top Performer** — Data Analysis Track, Cycle 5, Route Academy — 10/08/2026
